4. Further comments:

Invention I is drawn to antithrombin III variants wherein P2-P8 are varied. The description does not describe the location of P2-P8 within the antithrombin III sequence and therefore this part of antithrombin III cannot be searched for variants. An attempt has been made to find the Invention I sequence Glu-Glu-Glu-Glu/Asp - Leu/Val - Asp/Glu - Pro within the amino acid sequences provided, but this sequence cannot be found. This sequence itself is not provided independent of the antithrombin III sequences provided, and thus that sequence cannot be searched.
